

DCOE-TYPE TWIN SIDEDRAFT ADAPTER MANIFOLD

Powerful Weber induction just became easier to install with the Inglese™ DCOE-Type Twin Sidedraft Adapter Manifold. This permanent mold, precision cast adapter manifold mounts directly to any 4150-style carb opening and delivers increased airflow for greater engine horsepower. Made from aircraft quality 6061-T6 aluminum, these adapters deliver increased hood clearance and offer the performance and affordability of Weber twin sidedraft DCOE carburetion for a fraction of the cost of eight stack systems. The Inglese™ DCOE-Type Twin Sidedraft Adapter Manifold can be purchased individually or as part of a complete Inglese™ Induction System. Visit www.inglese.com for complete kit listings.

- Increased CFM – more airflow for increased engine power
- Mounts to any 4150-flanged carburetor system
- Aircraft quality 6061-T6 permanent mold casting

GAUGES

Inglese™ offers several gauges with different psi ranges for checking your fuel pressure, including two available for Weber carburetors and one for the Inglese™ EFI Induction Systems. Each has a shiny chrome-finish body and is properly calibrated for its application. All Inglese™ gauges feature a 1/8 NPT fitting and an Inglese™ logo on the face – so don't be fooled by cheap imitations.

| Fuel PSI Gauge w/ Colored Dial 0-8psi | NG3150 |
| Fuel PSI Gauge w/ Colored Dial 30-90psi | NG4012 |

REVERSE PLATE MOUNTING KIT

Until now, manifold casting for Weber IDA carbs required all of the carburetors to face the same direction. The Inglese™ Weber IDA Reverse Plate Mounting Kit changes that by allowing the reverse mounting of IDA carburetors to optimize linkage and fuel line set-up. The kit features CNC-billet construction, making for a precision fit and only raises the height of the carbs by 1/4-inch, so the modifications are virtually unnoticeable.

- Allows reverse mounting of Weber IDA carbs
- Allows user to orient fuel lines and throttle linkage either inboard or outboard
- Virtually unnoticeable hardware & adapter plates
- Includes all necessary bolts, studs, plates and eight carburetor gaskets
